

# Panasonic Navigation Camera Installation Guide

The **Panasonic Navigation Radio** can support up to four cameras, to improve visibility around the truck: Rear, LH, RH, and Front.

A camera view can be accessed manually at any time. The LH, RH and Rear views can also be set to automatically pop up when the reverse gear, the LH, or the RH turn signal is selected.

## CAMERA INSTALLATION PARTS

### Cameras

The Panasonic Navigation Radio can support up to four cameras:

- *Front*
- *Rear*
- *Left Side*
- *Right Side*

### Adaptor Harness

This supports up to four cameras.

### Optional Extension Cables

These are required if the standard cables are not long enough.

# Panasonic Navigation Camera Installation Guide

## CAMERAS VIA PACCAR PARTS

Two Camera brands are available through PACCAR Parts:

### **Pana-Pacific CVBS Analog Camera Kits**

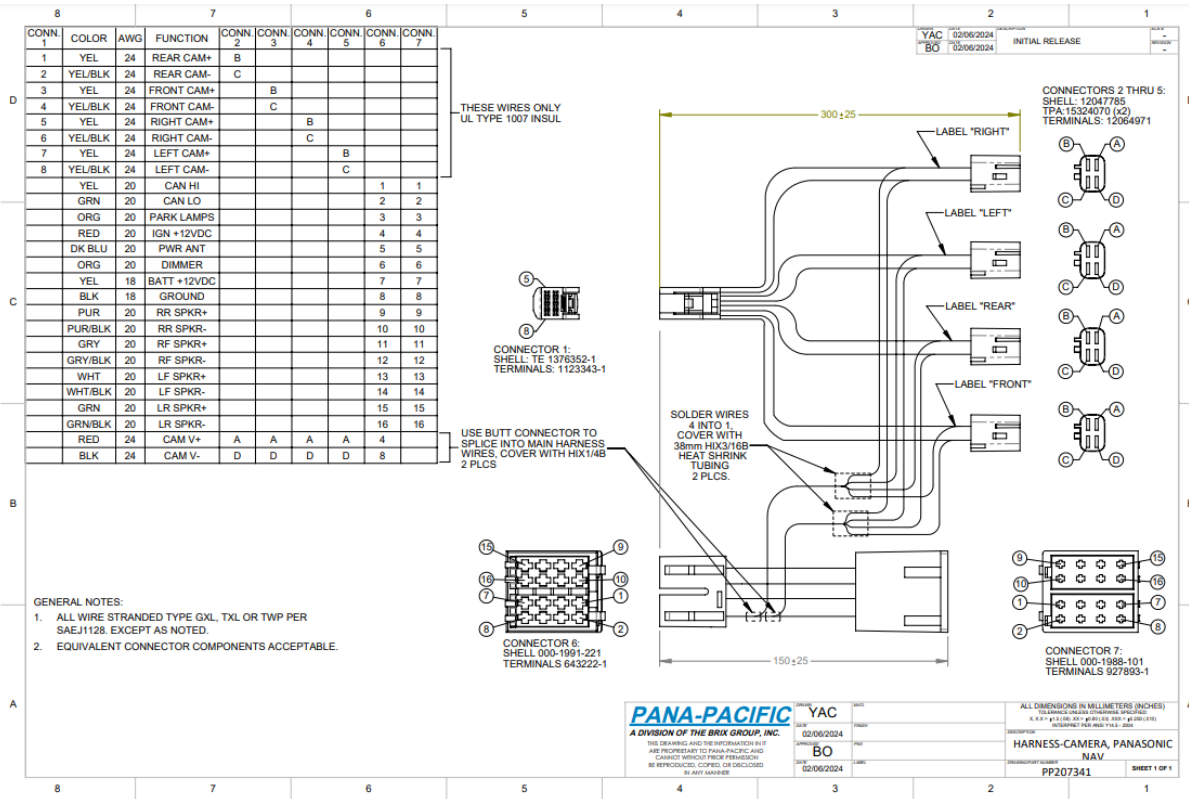

- *Left, Right, Front, and Rear cameras available*

### **TVI 720P Analog HD Camera Kits**

- *Left, Right, Front, and Rear cameras available*
- *Extension cables if required*

## PANA-PACIFIC INSTALLATION – PP207341 ADAPTOR HARNESS

PP207341 adaptor harness inserts between the silver box and the existing 16-way connector.

### To Install:

1. *Disconnect the truck 16-way connector from the silver box.*
2. *Mate the truck 16-way connector to the PP207341 adaptor harness.*
3. *Mate the PP207341 16-way connector to the silver box.*

# Panasonic Navigation Camera Installation Guide

## CAMERA DISPLAY ACTIVATION

After the cameras are connected physically, it must be specified what type are being used and enabled within the Panasonic silver box software:

### Enter the Advanced Menu

1. From the Home screen go to the Setup menu.
2. Scroll down and enter the System Version menu.
3. Tap the screen 8-10 times to access the Advanced menu.

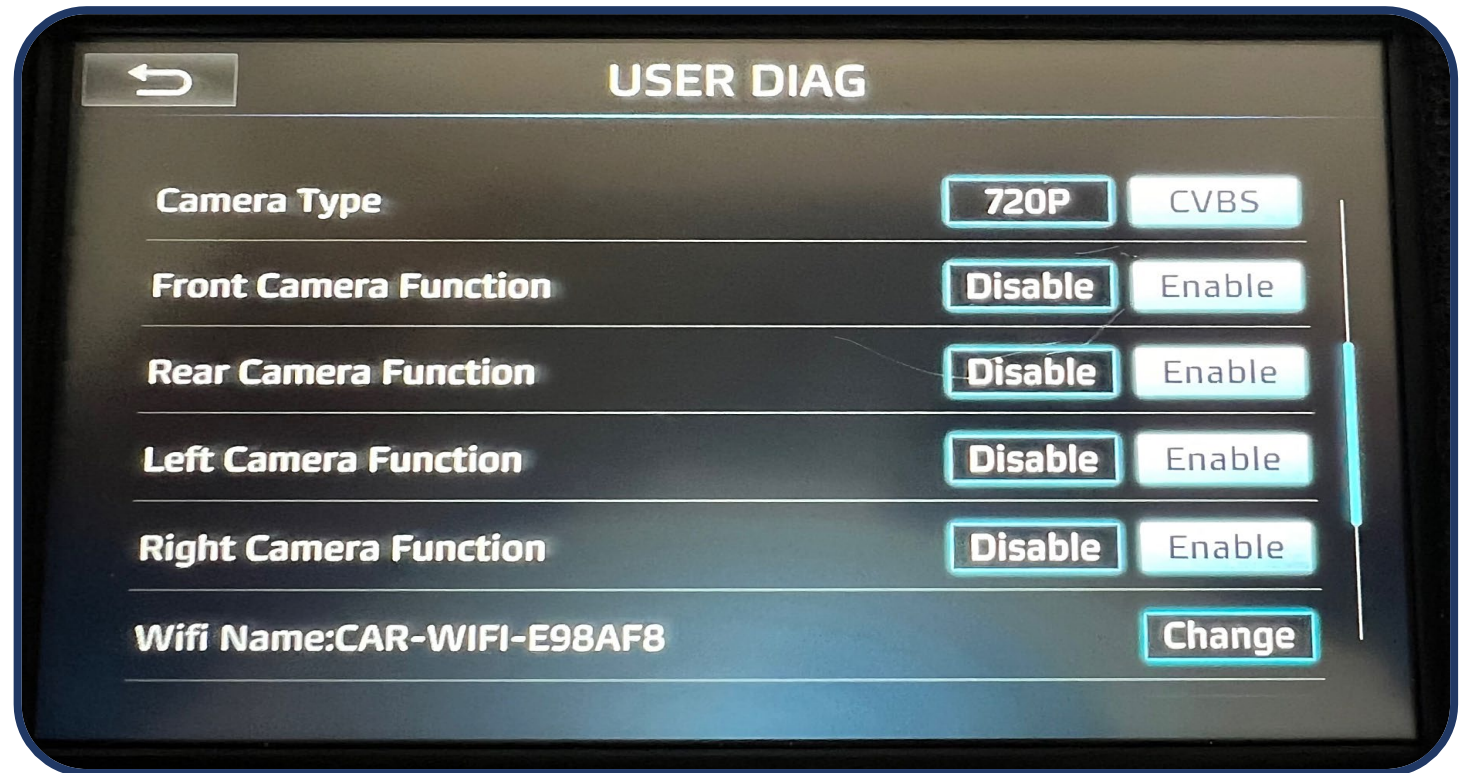

# Panasonic Navigation Camera Installation Guide

## CAMERA DISPLAY ACTIVATION

### Define Camera Type & Enable Function

1. *Select the Camera Type you will be using (cannot mix 720P with CVBS camera types) and enable all the cameras you will be using.*
2. *Select the return arrow on the top left corner. Radio will reboot and save changes.*

# Panasonic Navigation Camera Installation Guide

## MANUALLY SELECTING CAMERA VIEWS

Select “Camera” in the Home screen to access the available camera views.

Split screen of camera views will open.

# Panasonic Navigation Camera Installation Guide

## MANUALLY SELECTING CAMERA VIEWS

To activate a different camera view, select the “>” symbol.

Select from the Left/Right or Front/Rear that have a highlighted border.

The active camera will show on the top right corner of the split screen.

# Panasonic Navigation Camera Installation Guide

## MANUALLY SELECTING CAMERA VIEWS

To expand a camera view to full screen, tap the screen of your choice.

To return to split screen, tap the screen again.

# Panasonic Navigation Camera Installation Guide

## SETUP ERRORS

If the cameras are not enabled in the Advanced menu, the Camera icon in the Home screen will be disabled.

If the camera input is enabled, but no camera is connected, a black screen will be displayed.

# Panasonic Navigation Camera Installation Guide

## SETUP ERRORS

If the incorrect camera types are selected in the Advanced menu, the camera views will show distorted images like the image to the right.

Camera Type selected in Advanced menu and cameras being used must match. Cannot mix and match 720P and CVBS.

## AUTOMATIC CAMERA VIEWS

Individual camera views can be displayed automatically when a turn signal or reverse is selected. Views are triggered by the J1939 CAN messages for LH Turn, RH Turn and Reverse.

### Two Steps are Required:

1. *Automatic Camera Views must be turned ON in the Panasonic menu.*
2. *The J1939 CAN messages must be broadcast on the J1939 CAN bus connected to the Panasonic silver box.*

**NOTE:** Automatic Mode will only work if the Panasonic is in camera mode. Some truck models do not support some Automatic Camera Modes.

Kenworth Auto Camera Availability			
Model	LH Camera	RH Camera	Reverse Camera

## AUTOMATIC CAMERA VIEWS – TURNING ON

### To Turn Automatic Camera Views ON or OFF:

1. Select “Setup” in the Home screen.
2. Scroll down and enter the “Camera Settings” menu.
3. Turn the desired cameras ON.
4. Return to the Setup menu.

# Panasonic Navigation Camera Installation Guide

## BROADCASTING J1939 CAN MESSAGES

To ensure the proper CAN messages are broadcast for automatic camera mode, enter the Program area of ESA (use the program button at top).

**For NAMUX 2 Trucks** (Medium Duty, T270/T370):

1. Select the "Network Interface" tab.
2. Verify "Transmit CECU LC Message" is set to "Gateway or Route to VCAN".

**NOTE:** NAMUX 2 does not support a CAN message for reverse. Therefore, only manual mode is available for the rear camera on NAMUX 2 trucks. Automatic mode will not work.

# Panasonic Navigation Camera Installation Guide

## BROADCASTING J1939 CAN MESSAGES

For **NAMUX 3 Trucks** (C500, T660, T800 and W900 models):

1. Select the “Network Interface” tab.
2. Verify “Destination for Lighting Control Message” is set to “Vehicle Databus”.

Description	Locked	Value
Configure Which CAN Bus to Transmit Fuel Level Message		Disabled
* Databus Gateway		Enable
* Databus Router		Enable
Destination for Ambient Conditions Message		Disabled
Destination for Engine Aftertreatment SCR Reagent Tank 1 Message #1		Disabled
* Destination for Lighting Control Message		Vehicle Databus

# Panasonic Navigation Camera Installation Guide

## BROADCASTING J1939 CAN MESSAGES

For NAMUX 4 Trucks (T680 and T880 models):

1. Select the "Network Interface" tab.
2. Verify "Transmit CECU LC Message" is set to "Gateway or Route to VCAN".

3. Select the "Lighting" tab.
4. Verify "Turn Lamp Front Side Installed" is set to "Enable".

# Panasonic Navigation Camera Installation Guide

## J1939 CAN MESSAGES FOR AUTOMATIC ACTIVATION

The J1939 CAN messages used to activate camera views in Automatic Mode are:

- *SPN 2367, PGN 65089 Left Turn Signal*
- *SPN 2369, PGN 65089 Right Turn Signal*
- *SPN 2391, PGN 65089 Backup Light*

**NOTE:** There is no J1939 CAN message to activate the front camera. The front camera can only be selected manually.

# Panasonic Navigation Camera Installation Guide

## AUTOMATIC CAMERA MODE VERIFICATION

### To Verify Automatic Camera Mode is Active:

1. Select the "Camera" button.
2. Verify the default camera view is displayed.
3. Activate the turn signals and verify the LH or RH camera view pops up.
